## CEBC Launches its Advisory Council!

We're excited to announce the official launch of the CEBC Advisory Council - a dynamic initiative geared towards fostering innovation, collaboration, and strategic alignment within our industry.

### ▫ What is the CEBC Advisory Council?

The CEBC Advisory Council is composed of industry experts and thought leaders who will serve as strategic advisors, shaping CEBC's future direction. Their guidance will be instrumental in decision-making processes, ensuring that we remain leaders in our field.

### ▫ Council's Role ▫

- ✦ Providing essential input on key decisions, projects, or initiatives.
- ✦ Leading or supporting CEBC Working Groups to drive progress.

The CEBC Advisory Council embodies our commitment to excellence and innovation. Together, we are poised to make a lasting impact on our industry.

Keep an eye on our social channels as we announce the new members of the CEBC Advisory Council!

## CEBC Members News & Updates

### Tristar announces electric bunkering vessel for the UAE

Tristar Group has taken a bold step towards decarbonising maritime transport by partnering with Turkey's Akdeniz Shipyard to construct a hybrid bunker barge for the UAE. Scheduled for commissioning in Q1 2025, the vessel will be stationed at the Port of Fujairah, UAE's multi-

purpose maritime facility.

This innovative 750-cubic meter capacity bunkering vessel will feature diesel generators as backup to electric power. Notably, it will significantly reduce carbon emissions, aiming for over 50% reduction compared to conventional diesel propulsion.

Tristar Group CEO Eugene Mayne emphasized their commitment to green technology and sectoral change during the contract signing in Dubai. The vessel's construction at the Akdeniz Shipyard, the largest in Turkey and the Eastern Mediterranean, marks a significant milestone.

This pioneering move aligns with Tristar's global mission of providing end-to-end fuel logistics solutions while embracing sustainability in maritime operations.

## Emirates Glass and Emaar's Flourishing Partnership

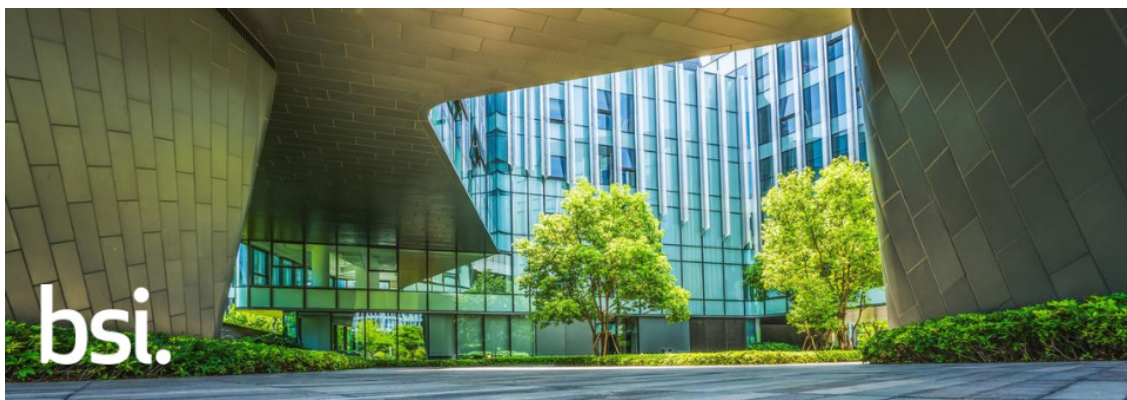

Emirates Glass is proud to announce that our collaboration with Emaar continues to thrive! Over the past year, Emirates Glass has proudly undertaken four projects for Emaar, delivering premium architectural glass solutions that uphold the highest standards of quality and innovation. These projects include Address Residences at Dubai Opera, Ill Primo, Golf Suites and an ongoing project of Palace Residences at Dubai Creek Harbour.

As trusted partners, we take immense pride in contributing to Emaar's vision of creating iconic structures that redefine skylines and lifestyles. Our commitment to excellence drives us to consistently provide top-tier glass products that not only meet but exceed expectations.

We look forward to further enriching our partnership with Emaar and are excited about the opportunities that lie ahead as we continue to innovate and elevate architectural design together.

## **BSI | Unlocking the advantages of sustainability through the circular economy**

The circular economy is a sustainable model focused on reusing, recycling, and repurposing resources to reduce waste. This framework

steers businesses towards a more sustainable future by efficiently managing material resources, creating new revenue opportunities, and mitigating risks in the supply chain. BSI has established standards to promote circular practices. Through adopting sustainable approaches, businesses can conserve energy, cut expenses, and play a part in fostering a healthier planet.

## **Customized Energy Solutions Unveils White Paper on Global Energy Storage Policy Overview**

Customized Energy Services has released a pivotal white paper titled "Global Energy Storage Policy Overview," addressing the urgent need for sustainable energy solutions. Highlighting the centrality of energy storage in achieving net-zero emissions targets, the paper underscores the significance of renewable energy and hydrogen in decarbonization efforts.

Key strategies include the adoption of renewable energy, energy storage technologies, and hydrogen solutions. The white paper outlines various energy storage technologies, from traditional pumped hydro to emerging options like battery storage and compressed air storage.

By providing a comprehensive reference, the paper aims to empower regulators, utilities, and stakeholders to navigate global policies and electricity frameworks, advancing the decarbonization of the electric grid.

## Middle East Clean Energy 2024 | 8-10 May 2024, Beirut, Lebanon

Join the Middle East Clean Energy, Lebanon's premier Clean and Renewable Energy Trade Fair. Held consecutively in 2022 and 2023, this event has attracted local and international exhibitors from Lebanon, China, India, and Turkey, facilitating trade deals worth millions of dollars. Discover the latest innovations in Solar Technologies, Wind Energy, Electric Mobility, and more. Our conference, attended by ministers, executives, and industry specialists, fosters crucial dialogue on energy transition. With over 42 key speakers in the past editions, the upcoming 3rd edition will be held on 8, 9 & 10 May 2024 at the InterContinental Phoenicia Beirut, promises even more insights and opportunities. Don't miss your chance to be part of this dynamic event shaping the future of clean energy in Lebanon and the Levant.
